

Isolated Power Drive

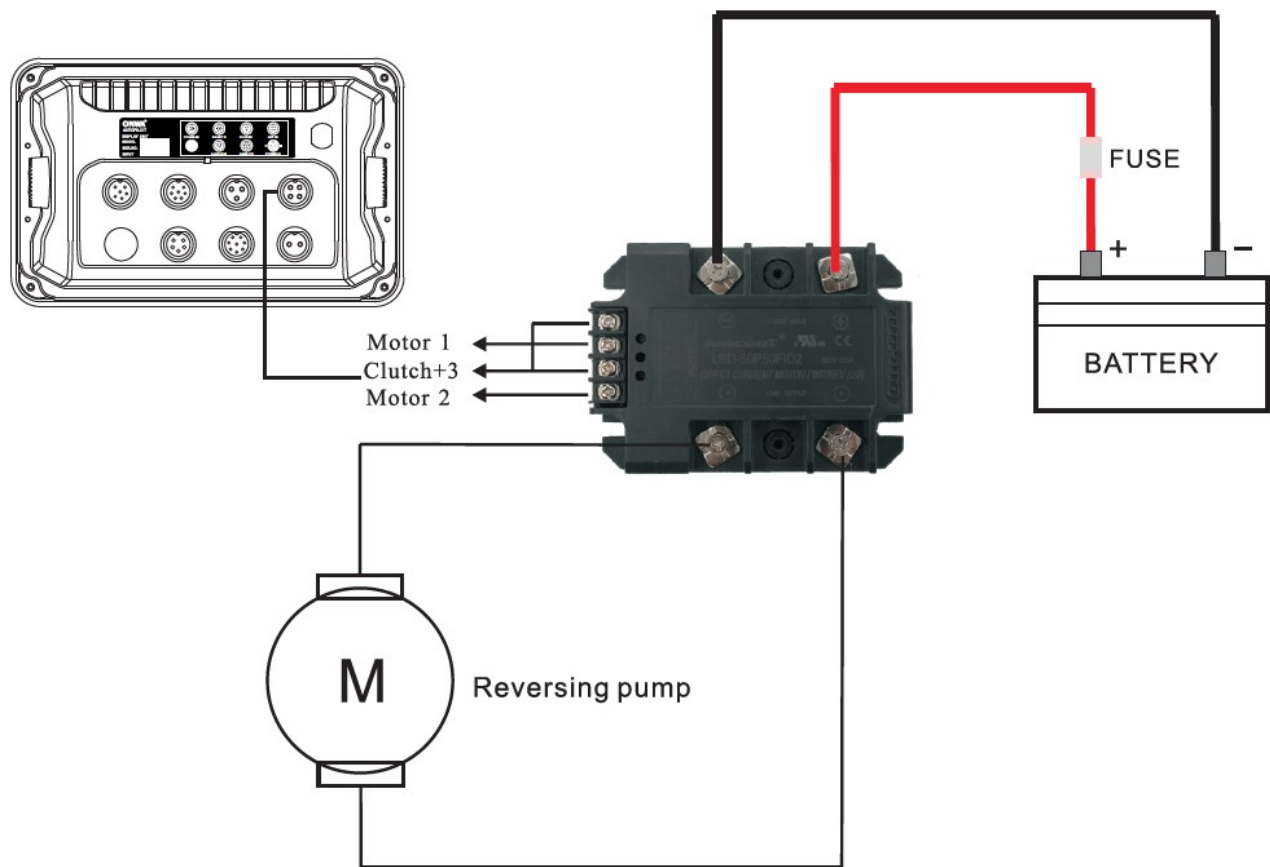

Model : LSD-50P50FID2

- The primary input and the secondary drive are electrical isolated.
- MOSFET switching circuit (no contacts)
- High working voltage up to 50VDC
- High working current up to 50A
- Easy installation

Use with ONWA KAP-866 autopilot

Connection with ONWA autopilot KAP-866

1. Connect LSD-50P50FID2 with KAP-866 and reversing motor as shown in above figure.
2. Set to "1. COMMON POSITIVE SOLENOID" in the installation menu of KAP-866
