

LITHIUM BATTERY PACK BP-234

Thank you for choosing this Icom product.
READ ALL INSTRUCTIONS carefully and completely before using this product.

■ Precautions

The BP-234 is a non-rechargeable Lithium battery pack. The following precautions must be observed:

- **NEVER** dispose of the BP-234 battery pack in a fire. This could result in a fire or explosion.
- **NEVER** short-circuit the BP-234 battery pack. Metal contact (such as a paper clip, another battery, and so on.) across the battery contacts can result in a sustained high discharge rate that could damage the battery, void the warranty, and create a burn or fire hazard.
- **NEVER** expose the BP-234 battery pack to excessive heat of 60°C (+140°F) or above. This could result in electrolyte leakage, possibly causing an explosion or fire.
- **NEVER** attempt to recharge the BP-234 battery pack. Lithium batteries may explode or cause a fire in such cases.
- **NEVER** disassemble the BP-234 battery pack.
- The BP-234 battery pack contains no user-serviceable parts. Internal battery gas can cause throat irritation. Also, exposed lithium may generate heat and ignite.
- **DO NOT** apply excessive pressure to the battery. This may result in electrolyte leakage, possibly causing an explosion or fire.
- The BP-234's storage life is about 7 years from the date of manufacture. Once the expiration date on the battery pack expires, a new battery pack **MUST** be purchased.
- For safety reasons, once you begin using the BP-234, a spare one should be purchased. Although you can use the original battery pack for regular communications, **KEEP** a brand-new battery pack for emergencies.

■ Disposal

The crossed-out wheeled-bin symbol on your product, literature, or packaging reminds you that in the European Union, all electrical and electronic products, batteries, and accumulators (rechargeable batteries) must be taken to designated collection locations at the end of their working life. Do not dispose of these products as unsorted municipal waste. Dispose of them according to the laws in your area.

■ About CE

Versions of the BP-234, which have the "CE" symbol on the product, comply with the essential requirements of the EMC Directive, 2014/30/EU and Battery Regulation, (EU) 2023/1542.
