

ACOUSTIC BEACON TESTER

The X98-BT is a low cost, handheld Acoustic Beacon Tester which is used to test the operation of the Underwater Locator Beacon installed on all fixed Protective Data Capsules of the VDR and S-VDR systems.

ADVANTAGES:

- Lightweight
- Low cost
- Auto-sensing functionality eliminating manual tuning to each different manufacturer's beacon frequencies
- Single handed operation

Engineers carrying out VDR and S-VDR annual surveys as well as Superintendents and Electro-Technical Officers carrying out routine checks need to test the Beacon located on the fixed data capsule. The X98-BT provides the most cost effective and reliable solution available.

The AMI X98-BT is designed and priced with the engineer in mind!

SPECIFICATIONS

SIGNAL All beacons in the 30-45 KHz range

- FEATURES**
- Used without removing the beacon from the capsule
 - Compatible with all major manufacturers including L3, Consilium, Kelvin Hughes, Furuno etc.
 - Audible test result "Power On" Indication
